

Barbaric Storage System

Unique design and narrow body. All essential functions and components are integrated. Touch screen and user control panel can be placed anywhere around the storage system. CAD-optimized product design and low net weights meet the high demands of fast speed and short cycle times. Only 100 mm lateral distance in all directions is required.

Rotation function, panel measurement and angle correction

With the 90° rotation unit, panels can be stored in all directions. In each stacking process the panels are measured and weighed. High process reliability through continuous measuring and recording of the weight of the panels. Orientation of the angular position while driving. 180° rotation unit optional.

Key Features

Crane Runway	up to 50 m
Crane bridge	up to 13 m
X Axis (movement speed)	130 m/min
Y Axis (movement speed)	110 m/min
Z Axis (movement speed)	40 m/min
Panel Size Length	2000 – 4200 mm* (max 5600 mm)
