

# Sotemapack Bundle Wrap 1350

Inlet conveyor by motorised ROLLERS or AMMERAAL BELTECH belt. Conveyor with speed adjustment by INVERTER. Possibility of modular increase of conveyor length. Pneumatically operated upper top product clamping rollers, controlled by photocells, to keep the product in a stable position during the whole wrapping and cutting operations. One set at inlet and one set at exit of the wrapping wheel. Depending of products to be wrapped the external material of the rollers can change to have a smooth and safe product handling.

Stretch film reel - holding wheel driven by a double friction system controlled by a frequency inverter in order to allow continuous adjustment of speed and acceleration. High performance motor with special brake.

## Key Features

<b>Stretch film reel diameter:</b>	250mm
<b>Stretch film reel width:</b>	250mm
<b>Stretch film thickness:</b>	17-30my
<b>Inner core diameter:</b>	76mm
<b>Installed power:</b>	3,0 KW
<b>Compressed Air:</b>	200 NL\min 6\7bar
